

# **Lose Weight Easily with Energy Therapy**

## **Workbook**

**Dianne Ruth, CCH, PhD**

[CLIENT EDITION]

# **INSTRUCTIONS FOR COMPLETING THE LOSE WEIGHT WORKBOOK**

**The statements listed in the following workbook are designed to respond to behavioral, psychological or emotional causes for compulsive overeating or overweight.** It is recommended that prior to undertaking any type of diet, you consult with your doctor.

Everything from hypothyroidism to side effects of medications including prescription and over the counter products, plus alcohol and some recreational drugs can potentially contribute to weight gain.

Sometimes overeating is the result of media propaganda such as advertising, early pressure from peers, friends, family, and other caretakers. Some other sources for originating limiting beliefs can be a desire for creating a sense of protection and personal safety. Low self-esteem can frequently be a factor.

Each of the statements can be a hook or trigger for overeating or overweight issues. They can be created out of old beliefs that evolve from well meaning parental “brainwashing” such as “...belonging to the clean plate club,” or “Think of all the starving children in other countries,” or as a reward, “Clean up your room and you can have some cookies.”

Out of the nearly 250 statements, most people only identify with about 25 to 45 of them. Often after defusing or neutralizing only a portion of the selected statements the rest of the issues automatically disappear. This is sometimes known as the “domino” or “ripple” effect.

Please go through the pages and check the boxes that most closely reflect your experience. **Rewrite any statements to more appropriately express your thoughts, feelings, experiences or beliefs.** Append any statements that can clarify or provide additional information or insights. Use the backs, margins, or other open space to make your notes; keeping your writing legible will save us time. Add more paper if needed.

When your workbook is completed make an extra copy so we can review it together. **Then we will proceed to apply energy therapy techniques to each selected statement until we gain resolution.** Deep inquiry as part of the process may be necessary for productive tracking so we can successfully tease out hidden or buried issues that could create self-sabotaging behavior later on. This will require our working together.

If you have any questions about filling out the workbook, please feel free to ask me about them so we can discuss your concerns.

- I resent having to maintain control ...

**COMFORT ZONES**

- I'm afraid to leave my comfort zone ...
- I want to stay the way I am ...
- Changing makes me anxious ...
- I feel more comfortable weighing \_\_\_\_\_ pounds ...

## **AFFIRMATIONS**

**Affirm the *real* want without describing what you *don't* want. (Use positive language).**

I [choose] to weigh (120) pounds and feel healthy and alive.

I [choose] my normal weight to be (160) pounds, and that's what I choose to weigh.

**Your goal must be achievable and realistic.**

Do you need to make your affirmations in 10 pound segments?

**Wherever appropriate, affirmations need to begin with “I choose....”**

[“I choose,” implies intention, commitment and action.]

**Add as much emotion as you can to your affirmations.**

**Music:** Sing your affirmations to your favorite tunes.

**Physical sensation:** Use fun, fluid body movements (skip or dance).

Write your affirmations every day (repeat them 10 times.) I [choose] to weigh (125) pounds and to feel healthy and free.

## **END RESULT IMAGERY**

Choose your successful ending....

Describe your goal....

Pretend you have already reached this goal; you have already attained the image; it is not something in the distant future.

Relax and close your eyes, and just flow with the directions I am giving you. Your success has already been achieved for the purposes of this exercise.

Pretend or imagine you can **see** yourself having accomplished your goal.... See yourself from afar, as if in a mirror.... See your world from inside you, looking out of your own eyes.... What does your face look like...? What does your body look like now that you have reached your ideal weight...? Do you have a different posture now that you have been successful...?

Imagine **hearing** two important people in your life acknowledging that you have reached your goal, congratulating you and responding to the news of your success.... Hear how you announced to these people that you reached your goal.... What did your friends say in response...? Can you hear his or her tone of voice...? Can you hear his or her excitement...? Take in the affirmation and congratulatory remarks....

Imagine (access) how your body feels **physically** now that you reached your goal.... Notice your posture and how you carry your

body, now that you have reached your goal weight.... How do you feel and fit in your new clothes at your new weight...? Do you sense how you sit differently when in a restaurant...? Do you feel lighter or have more energy...?

Imagine (access) how you feel **emotionally** now that you weigh your goal weight.... Tell me about your pride in your accomplishment (or just feel it inside of yourself)....

**Feel** the confidence, the satisfaction and enjoy those feelings now....

What **aromas** do you associate with your success...? “Smell” them now.... How does your food smell now that you are at your target weight...? How has your sense of smell changed now that you know you are successful...?

What **tastes** do you associate with reaching your goal...? “Taste” them now.... Access whatever new tastes you can associate with your success.... What would your food taste like now that you are happy and at your goal weight...?

**Put the entire picture together three times a day to build neurology, expectations and energy.**
