let ring

Therapy techniques are designed for facilitating mind & body interaction. Directive imagery, energy and clinically recognized tactile manipulations are utilized to stimulate emotional/physical health, plus a sense of euphoric well-being. This service is provided for select clientele in the privacy of their own environment.

**Reminder:** Minimum 4-hour cancellation needed, otherwise payment-in-full is expected. If you are detained, I will wait up to 15-minutes past appointment time; however, original schedule of completion time and price will have to be observed.
